

Foshan Easysail International Co., Ltd.

易启航国际有限公司

One-Stop Service Provider for International Trade of Construction Machinery

easysailchina.com

About Us

Foshan Easysail International Co., Ltd. is based in Foshan and Hong Kong, serving as a professional one-stop service provider for the global trade of construction machinery and equipment. Supported by our cooperation channels in Tianjin and other key logistics and trade hubs in China, we can efficiently help overseas customers source the machinery they need.

We have a professional sales and service team. At the same time, we have developed extensive supplier, agent and trader channels in China and other international markets, allowing us to quickly connect clients with excavators, loaders and other machinery resources, especially used equipment, with support in inspection, coordination and export execution.

About Us

We have a team of professional engineers. For construction machinery exported from China, we can also provide customers with testing, cleaning, painting, sheet metal, disassembly, packing, land transportation, customs declaration, sea transportation and other services according to their needs. At the same time, we are the designated service provider for the export of used machines of CAT, HYUNDAI, SHANTUI, DOOSAN, VOLVO, SUNWARD, Bobcat and other brands. We export more than 300 sets of construction machinery every year, covering 10 categories such as excavators, loaders, cranes, rollers, graders, pavers, trucks, pump trucks, dump trucks and forklifts.

We adhere to the business philosophy of "integrity, transparency, and professionalism" and provide one-stop services for construction machinery export to customers in China and around the world.

Cleaning and protection

Our site can clean the machine. We are familiar with the customs standards for machine cleaning in different countries. For example, Australia, Colombia and other countries have high standards for cleaning imported machines. We export a lot of machines to these countries every year, and these machines can be imported to the destination country smoothly after our cleaning and disinfection. In addition to cleaning, we also provide customers with services such as disinfection, spraying protective wax, rust removal, corrosion prevention, cylinder protection and so on. Ensure that the machine is delivered to the customer in the best possible condition.

Sheet metal and paint

We have a professional sheet metal and painting team, and rich experience, according to the needs of customers, to provide customers with sheet metal and painting services. We will first clean the machine to ensure that the machine is in a clean state. Then we will complete five basic processes according to the operation process, and then we will complete three times of painting, so that the effect after painting can reach the standard of the new machine when it leaves the factory.

Inspection and maintenance

We have rich experience in inspection and maintenance, and can provide services for customers. We will be based on the needs of customers. Carry out professional inspection on the engine, hydraulic system, circuit system, structural parts and other parts of the machine, and provide maintenance programs for customers. Our engineers will carefully check the performance of the machines of our customers and tell them the true condition of the machines. We have very good maintenance capabilities. We are committed to the good performance of the machines we have repaired.

Disassembly and packing

We provide customers with the best transportation plan according to the size of the machine and the transportation requirements of customers. We will determine the plan of disassembly and packing according to the transportation plan. With the cooperation of cranes, forklifts and all necessary machines, our professional engineers complete the disassembly of the machine according to the needs. According to the transportation plan confirmed with the customer, the machines to be dismantled will be safely sent to the port to start transportation.

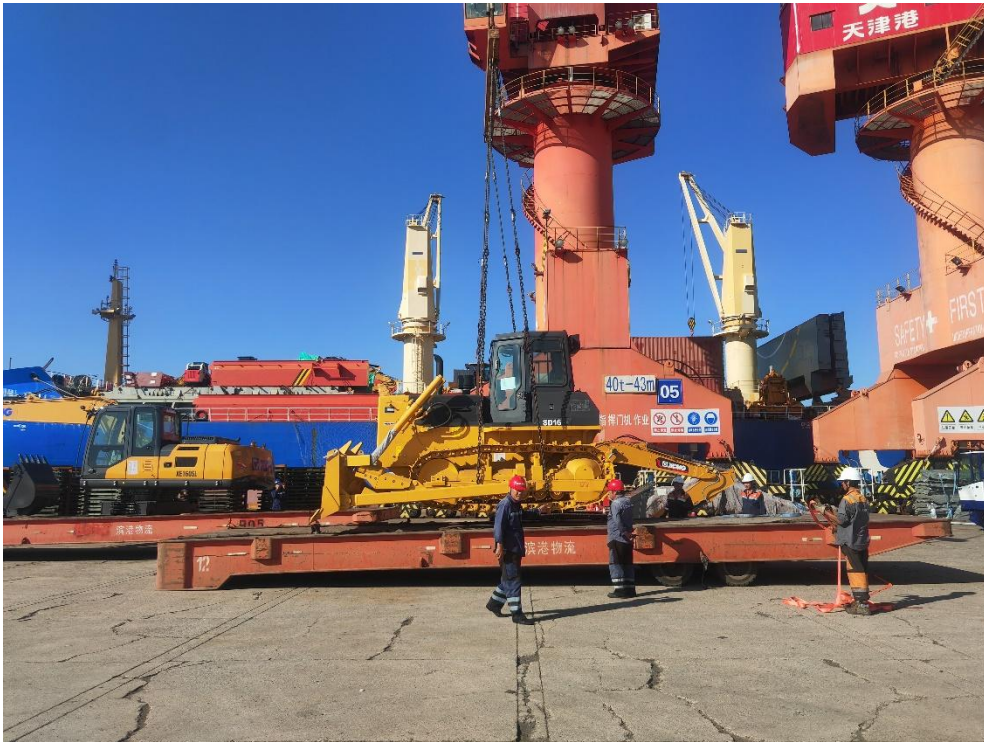

Land transportation and port gathering

We work with more than 100 logistics companies in China to provide customers with safe land transportation services according to their needs. We can not only help customers transport machines from their location to our yard, but also transport them to the port to help customers complete export and shipping efficiently.

Customs clearance and sea transportation

We provide China's export services according to the needs of customers, including customs declaration, marine transportation. According to different machines, we will make different transportation plans for customers, including containers, FR, bulk carriers, ro-ro ships and so on. If the destination country required by the customer can only be transported by land, we can also use trucks and trains to complete the transportation for the customer and deliver the machine safely to the destination required by the customer.

Attachments and Parts

We cooperate with a large number of factories, we provide you with high-quality hydraulic attachments and parts, We will become your excellent partner.
